LANSING CONNECT

Lansing Connect is a convenient mobile and online service request system that allows residents to report non-emergency issues directly to the City of Lansing. Submitted reports are routed to the appropriate department for resolution, and users can track progress and receive updates.

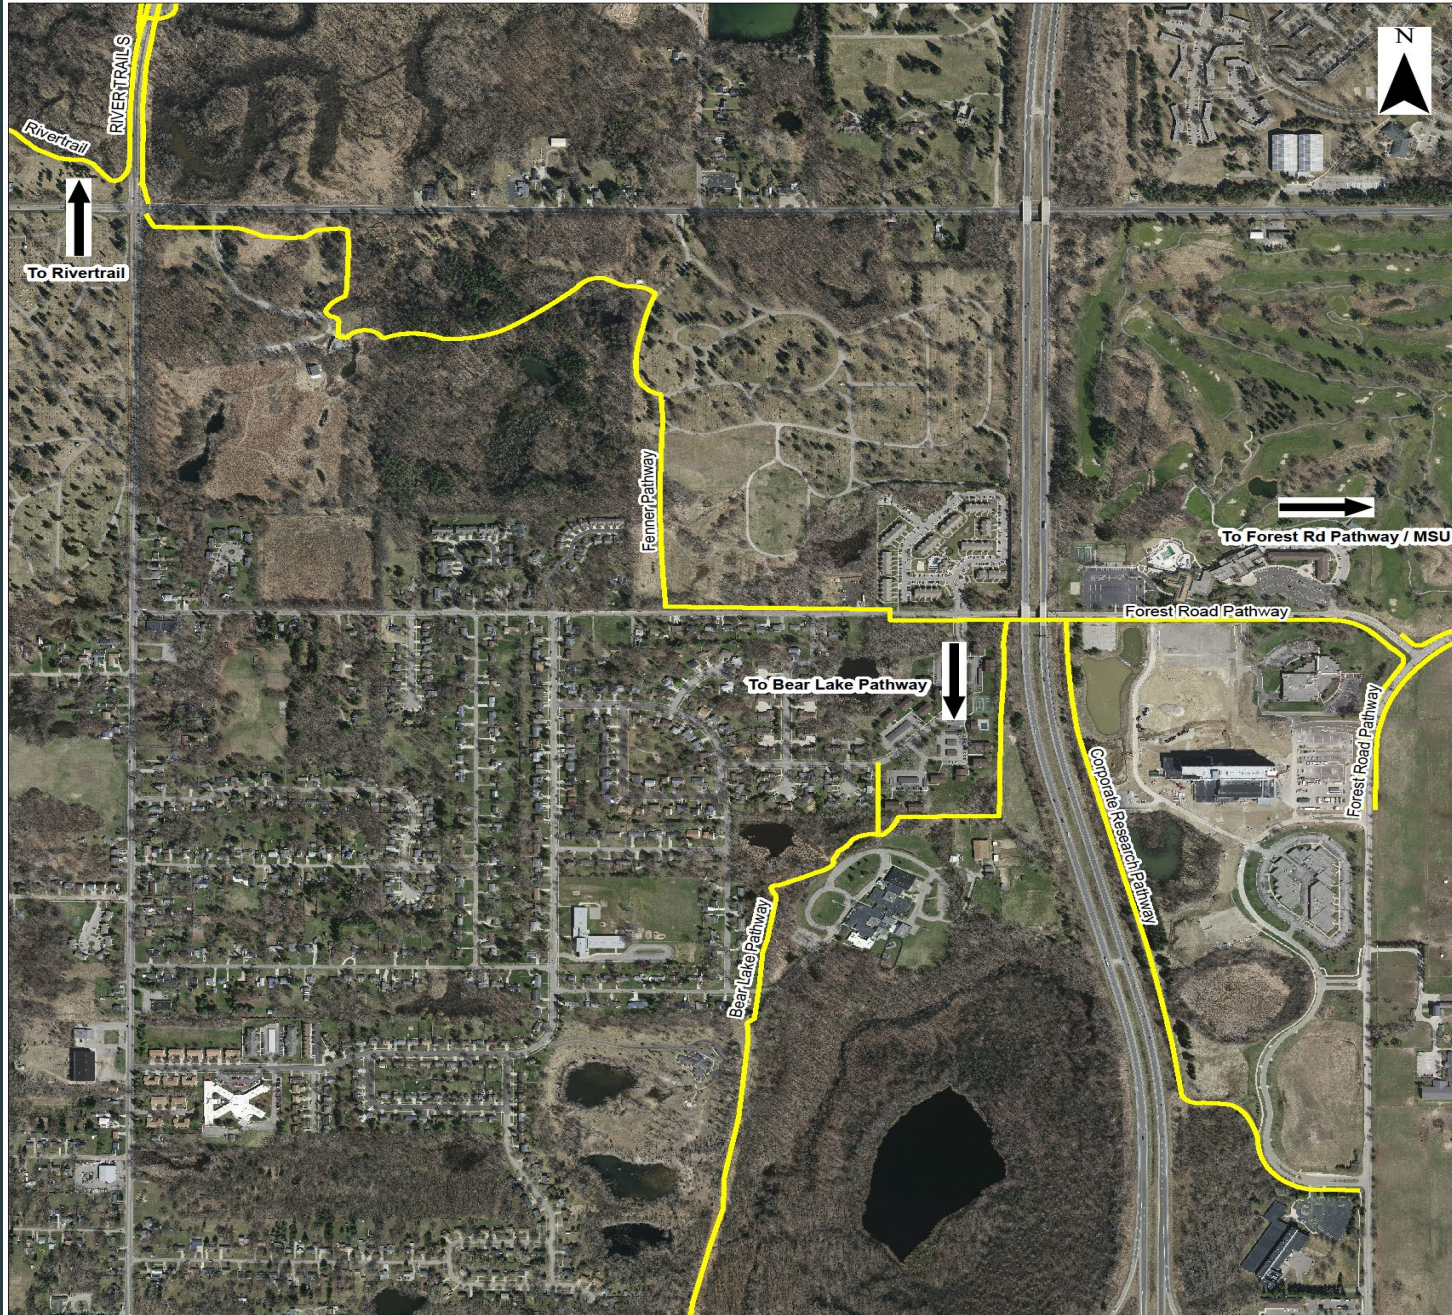

Residents can submit requests online or through the Lansing Connect mobile app, with the option to upload photos or videos for better issue identification.

For emergencies, always call 9-1-1. For assistance with reporting an issue contact the Public Service Department.

NON-MOTORIZED TRANSPORTATION PLAN

The City of Lansing is updating its non-motorized transportation plan to improve biking and walking networks, making it easier, safer, and more enjoyable to get around the city.
