Student-run Climate  
Organization**

# OUR MISSION

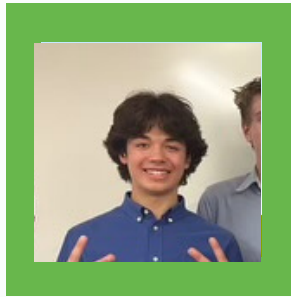

## Creating a Sustainable Community

SCCE (Students Cutting Carbon Emissions, Inc) is a student-run organization dedicated to reducing carbon emissions through impactful investments. The focus on emissions has the greatest leverage to prevent climate change as a whole. We will bring people together in our community to help impact this global environmental problem. Through a variety of fundraisers, social media campaigns, and events, we plan to raise money and invest funds to help save the planet.

# THE CUT CARBON RUN

Our 2025 3<sup>rd</sup> Annual Event

## THE RUN

Our 3<sup>rd</sup> event is aimed to bring awareness to the issue of carbon emissions and raise money to help the cause. The run will feature a 5K race and a 1 mile fun run, in which participants can walk, jog, or run. The route follows a scenic path through Shaker Heights, featuring the historic Shaker Lakes and beautiful landscape that we are lucky to have in our area!

Saturday, August 1st, 8 AM

## THE IMPACT

Carbon Emissions are the greatest factor harming our environment. The Cut Carbon Run will raise awareness and all proceeds will be invested in the Cut Carbon Note, run by Calvert Impact. By investing capital in a continuously growing fund, the impact of our contribution will reach well beyond that which we could accomplish alone.

# GOALS MOVING FORWARD

Expanding our impact

## FUTURE EVENTS

As we grow as an organization, we plan to host more events and fundraisers to benefit our cause. We will focus on creating lasting partnerships with local businesses to expand our connections into the community.

## INVESTMENTS

By investing our proceeds from this run into the Calvert Cut Carbon Note, we know we are making a sustainable impact on green industries. The investment fund is focused on reducing carbon emissions in building projects across America, and is aligned with the values of SCCE. We plan to raise and invest capital as we grow and expand to other industries in order to further reduce carbon emissions.
