- **Hill #1** comes immediately – 6/10th mile into the ride. Participants will climb about 170 ft. over about 1.3 miles – with the steepest section at the beginning.

- Just before turning right on Derby – participants will ride through the “Sycamore Tunnel”. This will happen at about the 14.3 mile mark of the ride. (not a traditional tunnel – a “tunnel” of sycamore trees)
- Go 0.6 miles – turn right on Pinehurst Rd.
- This is an unmarked turn – be looking for our directional signs and spray chalk arrows. HINT: If you start seeing scores of solar panels on your right – you missed the turn!
- Once you make this right turn – you will in fact ride past a mile of solar panels on your left.
- As soon as the solar panels end – be prepared to make a left turn and grab a water bottle. This left turn is the water bottle handoff location.
- This left turn is Cedar Lane Rd, and as soon as you turn left, be prepared for a quick right turn.
- This right turn is Richmond Rd.
- **Hill #2** begins ½ mile after turning on Richmond Rd. This hill gains about 180 ft. over a 1.4 mile stretch. This hill is at the 17.4 mile mark of the ride.
