IMPORTANT INFORMATION

You can download your Ride with GPS tour routes for use offline to save your phone battery and/or avoid using data while riding. To download maps for use offline, tap the Download button on the bottom left corner of any of the selected routes. It may take a few minutes to download. This works best when connected to a Wi-Fi network. Once your download is complete, you will have full access to that route and map even when you are not connected to a cellular network or Wi-Fi.
