

# Twin City Track Club's New Year's Day QR Challenge

**When:** 8AM to 5PM on New Years Day – 1/1/2021

**How it works:** You will show up at the starting location and look for the first QR barcode sign to scan. Using your phone you will scan the barcode with either the free “QR Reader” app which is strongly recommended or if not you can use the camera app on your phone as a back up and scan it that way.. however it is harder to read the clues that way. Once you scan the code it will have a message for you. The message will be a statement/riddle that will you will need to solve, and the answer will guide you to where you need to go to find the next clue. Continue this process until you have found all 8 QR Barcodes and the final destination. Your final clue will be close to the starting location so that you can get back to your car easily. You can take your time with the scavenger hunt or if you really want a challenge than time yourself and map it on strava and see if you can be the quickest to finish...bragging rights are up for grabs! It isn't called a QR (Quick Response) code for nothing!

**What you will need:**

- Phone – you must carry your phone in order to scan the barcode apps to read off the clues
- Creative Mind – to help solve the clues....some are TCTC related and some are general clues
- Smile – we encourage you to go out and have fun while searching for your clues, take a selfie along the way and tag us in it, we would love to see your pics!

**Here is the first QR barcode you will need to scan in order to determine your starting location for the QR Code Scavenger Hunt.** Remember the clues will only be out on New Years day from 8AM-5PM so plan accordingly! Make sure you scan this first barcode with your phone prior to starting to make sure your ready and can read the clues/messages without a problem!

Barcodes will look very similar to this, with TCTC name, and about 8x11 size.
