How to Find your Results

When we switched our website over, our results formatting changed. We know that many of you still want to see the old, legacy style of results and we want you to know that we still post those for most events. We get a lot of questions on how to view the new results formatting and how to find the old legacy style results so let us explain here for you. Each race has a set of Results that are posted that you can choose from. The results that are posted immediately (Called the RSU Results) are used for live results, scrolling results on the TV displays and for text/email result notifications. There are a few things to keep in mind with these RSU results:

- These RSU results are also updated instantly for any changes on an ongoing basis.
- They will always appear first in the drop down menu under the race.
- The Open and Age Group Results will appear below the overall results.
- To see all finishers, you can click on the option below the overall finishers to change the view per page:

- You can use the filter buttons to sort and filter the data however you like, such as filtering by gender to show only females or sorting by Age Percentage (PLP) to see these in order of highest to lowest. You can do this by clicking on the header with the up and down arrows.

- At the moment, Team results will not show in this set of results. To view Teams, you will need to choose the Legacy Style results.

The legacy style results will be added after the race is over and will appear in the drop down menu below the Participant Lookup & Tracking Options if available. See the screenshot below for an example:
